Who am I?

- A passionate, creative game designer, programmer, and educator with an affinity for art, experimentation, music, and individuality in game development.

What can I do?

- I'm a passionate indie developer capable of developing games through planning, design, development, and release stages.
- I'm conversational in all aspects of game development, which greatly helps me communicate ideas to diverse teams of varying skill sets.
- I have a strong command of the following programming languages : C#, C++, Java, Python, and Javascript , and am also comfortable using Git.
- I'm an excellent speaker and communicator with lots of practice from teaching ages 8-18 game design, web design, and programming for over 4 years.
- I'm an educator with five years experience teaching unity and programming.
- I have great time management skills honed through the constraints of solo development, contact work, and game jams.
- I'm a Unity engineer, with several years of personal and teaching experience. I'm comfortable with a variety of unity supported tools (shadergraph, probuilder, FMOD) as well as editor and engine scripting.
- I'm a capable web application developer with experience building and teaching full stack systems.
- I have experience in community management, which lends itself very well to communicating ideas in collaborative forums and workplaces.
- I have experience in visual art, music, and sound design through independent game development. I'm capable of and prefer working in many parts of a development cycle.
- I'm an excellent team member and leader, with experience organizing and coordinating with small (~5 person) teams.
- I have an engineer's perspective on design, the constraints of solo development excite and intrigue me. I love coming up with creative solutions to solve problems to overcome those constraints, and make my workflow more efficient and scalable.

My Work History

- Junior Unity Developer at Game Grumps Inc (Homebody) (2022-Current)
  - Responsibilities :
    - Testing and implementing gameplay features to a 3d psychological horror game.

Education

- Bachelors of Computer Science from San Francisco State University

My Accomplishments/Projects
-Professional Development and Design Work

- **Homebody**
  - Psychological horror fixed camera perspective game, inspired by classic Clocktower games and Resident Evil.
  - I was hired as a Junior Devfor this project to do unity generalist work and close out the project in its final months,, but after proving myself was given a deeper role in the project. I implemented several gameplay systems by myself.
- **Gone Fishing (Source Code)**
  - Relaxing web based fishing game.
  - Promotional game for electronic artist Harris Cole commissioned by ALT:VISION Records.
  - Solo Developer project, I did it all!

-Personal Work/Game Jams

- **Zanderian Prince Simulator (Source Code) (GDD)**
  - Web browser Lucas Pope inspired email scam simulator. Made in one week.
  - Best Team Game in Repl.it's 2018 Money Game Jam
  - Lead Developer, Programmer, Game and UI Designer (4 Person Team)
- **Alibi (Source Code) (GDD)**
  - Interrogation focused criminal mystery game. Made in one week.
  - Top 10 for Audio in Brackeys Game Jam 2020.1
  - Lead Developer, Programmer, Game Designer, Audio Designer (2 Person Team)
- **Condor**
  - Hacking themed grid based puzzle game. Made in three days.
  - Everything! (Solo Project)
- **Beat Battle (Source Code) (GDD)**
  - Commercial rhythm rpg project currently in development, inspired by the Paper Mario RPG series.
  - Lead Developer, Programmer, Gameplay Designer, Project Manager (4 Person Team)

Hobbies/Interests

- Making beats, experimental ambient music, and jazz piano.
- Caring for and doting on my many house plants.
- Running and playing in D&D and GURPS campaigns with friends and students.
- Playing the newest and weirdest games I can find and recommending them to friends.
